DETAILED ACTION

Election/Restrictions

This application is in condition for allowance except for the presence of claims 1-6 drawn to specie non-elected without traverse. Accordingly, claims 1-6 have been cancelled.

EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

The application has been amended as follows:

Cancel claims 1-6.

Drawings

Figure 1A should be designated by a legend such as --Prior Art-- because only that which is old is illustrated. See MPEP § 608.02(g). See MPEP § 608.02(g). Corrected drawings in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Priority

Acknowledgment is made of applicant's claim for foreign priority based on an application filed in Canada on 27 February 2003. It is noted, however, that applicant has not filed a certified copy of the 2,420,521 application as required by 35 U.S.C. 119(b).

Reason for Allowance

Claims 7, 14, and 15 are allowed. Claims 7, 14, and 15 are drawn to a phase mask for photoinducing a Bragg grating, and a system and a method of using the same. Contrary to prior art, which use various methods to apodize the Bragg grating so that spurious reflections and effects of the spurious (unintended or unwanted) reflections are minimized or limited, the applicant claims a phase mask that is designed to generate spurious reflection features to photoinduce apodized grating fringes of the Bragg grating. This phase mask for photoinducing the Bragg grating, the system and the method of using the phase mask invert traditional apodization processes for the Bragg grating known in the art. The claimed improvement to apodization process of the Bragg grating cannot be obtained through routine experimentation and it therefore non-obvious to one of ordinary skill in the art. It is the examiner's opinion that the prior art of record, taken alone or in combination, fails to disclose or render obvious the phase mask that is designed to generate spurious reflection features to photoinduce apodized grating fringes of the Bragg grating, in combination with the rest of the limitations of the base claim.

Claims 8-13 and 16-24 are allowed as dependent claims of the allowed claims 7 and 15.
